WAVECENTER OPERATIONS PLATFORM

Our WaveCenter Operations Platform gives you a centralized view of all remote IT and communications devices, assets, and services including trouble tickets, incident, and field dispatch.

COMMUNICATIONS PRODUCTS

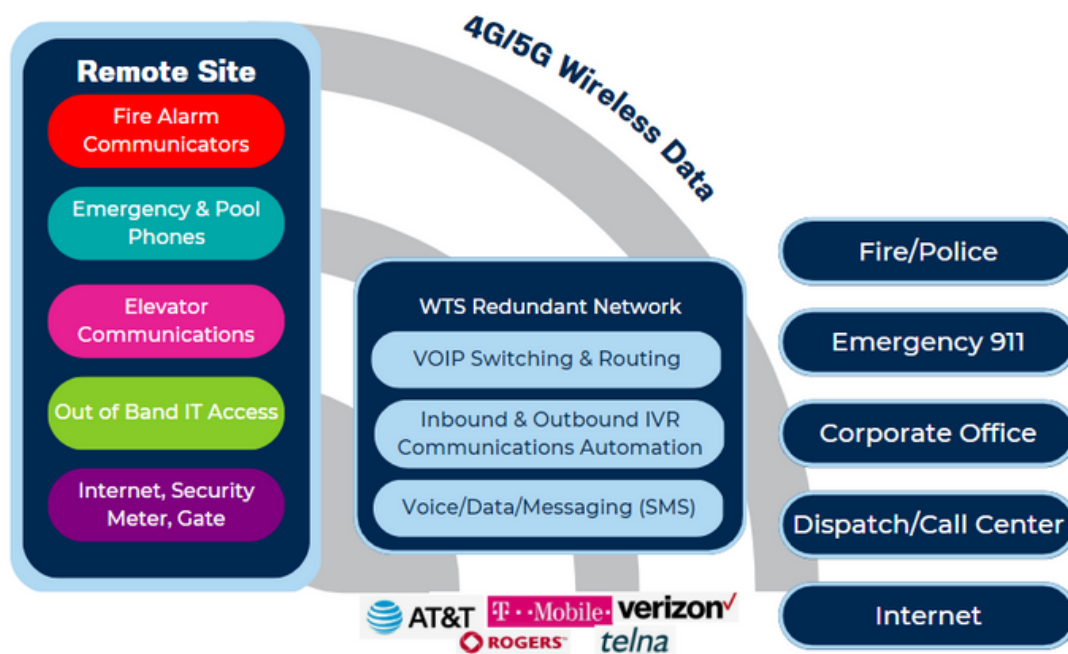

Our Wireless POTS Replacement, Fire/Alarm Communicator, 5G Wireless Internet, and Automation products provide the highest reliability, flexibility, and value for critical and emergency communications.

IT SOLUTIONS & SERVICES

Our team of IT professionals makes deployment, compliance, HW/SW fulfillment, and lifecycle management easy with the highest quality 24X7 remote and local support with a national footprint.

At WTS we help our customers successfully deploy and manage complex multi-site IT solutions and communications networks. We pride ourselves on listening to our customers, and our solutions and support programs are tailored to their needs. Trained to support and manage wireless, network, and IT solutions, our team of dedicated technicians across North America ensures prompt and reliable support. Using our WaveCenter operations center, customers get customized dashboards to manage their assets and remote devices, monitor communications, and get real-time access for trouble ticket and field service dispatch management. At WTS, our commitment is your success.

The FCC is calling for the discontinuation of all domestic copper landlines service or POTS lines by 2023

The WTS team provides centralized procurement and fulfillment services to complement our field installation, design, deployment, and service technicians across the US and Canada with certifications and technology expertise to ensure success for our customers. Our capabilities in this area combine procurement and asset management, IT solutions and services, and complete visibility using our WaveCenter operations platform

The WTS Advantage

- **Increases Reliability:** Direct Tier 1 Multi-Carrier Relationships with Network Redundancy
- **Easier Lifecycle Management:** Turnkey Solution Installed, Maintained, and Upgraded by WTS
- **Decreased Costs:** More savings Per Month Compared to POTS with NO ADDITIONAL Lifecycle Costs
- **Customer Focused:** We Upgrade HW/Software to 5G and Beyond for Greater Speed and Capabilities
- **Better Visibility & Control:** Our Global Command Center gives you 24/7 Monitoring, Tracking, and Asset Mgt.

Wireless Technology Solutions offers the industries most reliable and comprehensive end-to-end solution with direct tier-1 carrier relationships, 24/7 WaveCenter Operations Platform Center Access, and network redundancy to reduce cost and provide an exceptional customer experience.
